

Department of the Navy, DoD

§ 767.9

manager when the sunken vessel or aircraft is located within a unit of the national park system, the national wildlife refuge system, or the national marine sanctuary system.

(b) Permits must be carried aboard research vessels and made available upon request for inspection to regional preservation personnel or law enforcement officials. Permits are non-transferable. Permit holders must abide by all provisions set forth in the permit as well as applicable state or Federal regulations. Permit holders should abide by applicable regulations of a foreign government when the sunken vessel or aircraft is located in foreign waters. To the extent reasonably possible, the environment must be returned to the condition that existed before the activity occurred.

(c) Upon completion of permitted activities, the permit holder is required to submit to NHC a working and diving log listing days spent in field research, activities pursued, and working area positions.

(d) The permit holder must prepare and submit a final report as detailed in § 767.9, summarizing the results of the permitted activity.

(e) The permit holder must agree to protect all sensitive information regarding the location and character of the wreck site that could potentially expose it to non-professional recovery techniques, looters, or treasure hunters. Sensitive information includes specific location data such as latitude and longitude, and information about a wreck's cargo, the existence of armaments, or the knowledge of gravesites.

(f) All recovered DON cultural resources remain the property of the United States. These resources and copies of associated archaeological records and data will be preserved by a suitable university, museum, or other scientific or educational institution and must meet the standards set forth in 36 CFR part 79, Curation of Federally Owned and Administered Archaeological Collections, at the expense of the applicant. The repository shall be specified in the permit application.

§ 767.8 Requests for amendments or extensions of active permits.

(a) Requests for amendments to active permits (e.g., a change in study design or other form of amendment) must conform to the regulations in this part. All necessary information to make an objective evaluation of the amendment should be included as well as reference to the original application.

(b) Permit holders desiring to continue research activities must reapply for an extension of their current permit before it expires. A pending extension or amendment request does not guarantee extension or amendment of the original permit. Therefore, you must submit an extension request to NHC at least 30 days prior to the original permit's expiration date. Reference to the original application may be given in lieu of a new application, provided the scope of work does not change significantly. Applicants may apply for one-year extensions subject to annual review.

(c) Permit holders may appeal denied requests for amendments or extensions to the appeal authority listed in § 767.5.

§ 767.9 Content of permit holder's final report.

The permit holder's final report shall include the following:

(a) A site history and a contextual history relating the site to the general history of the region;

(b) A master site map;

(c) Feature map(s) of the location of any recovered artifacts in relation to their position within the wrecksite;

(d) Photographs of significant site features and significant artifacts both in situ and after removal;

(e) If applicable, a description of the conserved artifacts, laboratory conservation records, and before and after photographs of the artifacts at the conservation laboratory;

(f) A written report describing the site's historical background, environment, archeological field work, results, and analysis;

(g) A summary of the survey and/or excavation process; and

(h) An evaluation of the completed permitted activity that includes an assessment of the permit holder's success of his/her specified goals.
